*lov-1* gene structure: 16.7 kb rescuing clone

FIG. 2B

Schematic of GFP fusion constructs and expression data

	EXPRESSION PATTERN	DOMINANT NEGATIVE
plov-1::GFP1	strong, male specific sensory neurons: CEMs, rays, HOB	Yes
plov-1::GFP2	faint, non-sex specific	No
plov-1::GFP3	faint, male specific: one or two unidentified neuron(s)	No
plov-1::GFP4	faint, non-sex specific	No
plov-1.3	stop	Yes

FIG. 3A

6/7

Behavioural phenotypes	Expression pattern	Subcellular localization
<i>lov-1</i> (sy552) rescue	wild type	
-	male-specific sensory neurons: CEMs, HOB, rays nonspecific; ring neurons (weak)	Uniform (cell body, axon, dendrite)
-	male-specific sensory neurons: CEMs, HOB, rays	Basodendritic (Cell body, sensory ending)
